

Authorized Elektro-Metall Repairs

Derco is the North and South American authorized repair facility and distributor for Elektro-Metall (EME) Airbus components. Derco stocks thousands of commercial and military spares, offers industry leading turn-around times, and has access to required OEM technical data and engineering support. All repairs are done in accordance with the latest OEM component maintenance manual (CMM) using only OEM parts.

A Winning Solution – Dedicated to Service, Quality and Reliability

For more than 30 years, Derco has been offering a complete package of service, quality and reliability not found anywhere else. Derco is ISO 9001:2015 certified, AS9110 aerospace standard registered, and certified to FAA Part 145, and EASA with Accessory Class I, II, and III ratings. Comprehensive capabilities include: electro-mechanical, mechanical, pneumatics, hydraulics, instruments, and avionics.

Derco's 80,000 square foot state-of-the-art overhaul and repair facility allows Derco to deliver cost-effective solutions that meet or exceed OEM-quality testing specifications.
